Hujaif Belim

Flutter Developer | App Development & Software Engineering Intern

Ahmedabad, India | 8320550931 | hujaifbelim@gmail.com | github.com/hujaif21 | linkedin.com/in/hujaif-belim21

SUMMARY

IMCA student and Flutter developer who builds cross-platform mobile apps with Dart and Flutter, using Python (FastAPI) and Supabase backends. Experienced in integrating AI/LLM APIs, with a solid base in Java, Python and C, and UI/UX design skills in Figma. Seeking a Flutter / App Developer or SWE internship.

EDUCATION

LJ University, Sarkhej, Ahmedabad *2024 – 2027 (Expected)*

Integrated Master of Computer Applications (IMCA) | Currently in 5th Semester | CGPA: 8.95 (Sem 4)

TECHNICAL SKILLS

Mobile: Flutter, Dart, FastAPI (backend for mobile apps)
Languages: Dart, Python, Java, C, JavaScript, PHP, SQL
Backend & Web: Supabase, PostgreSQL, Spring, HTML, CSS, JavaScript
AI / LLM: LLM API integration (Gemini), prompt engineering, text-to-speech integration, AI-assisted development
UI/UX Design: Figma, Miro, Penpot, wireframing, user research, design systems, WCAG AA accessibility
Tools: Git, GitHub

PROJECTS

FitZen — Fitness Tracker App *In Progress | Team of 3*

Flutter, Dart

- Built a food-scan feature that returns real calories, protein and carbs for scanned food items
- Implemented a pedometer that tracks real step counts using the device's motion sensors
- Designed the brand identity, logo and custom theme for a consistent cross-platform UI

MockMate AI — AI Interview Preparation Platform *In Progress | Team of 3*

JavaScript, Python, Supabase, PostgreSQL, Google Gemini API

- Building a web app that simulates job interviews with dynamic, role-based questions and AI-generated feedback
- Integrated Gemini with a local NLP fallback to score answers on communication, structure and technical depth
- Set up Supabase Auth and Postgres with Row-Level Security, plus a code editor and PDF feedback-report export

Dhikar Counter App & NotMyFault — Flutter Mobile Apps

Flutter, Dart, FastAPI, Python

- Developed Dhikar Counter, a cross-platform counting app built with Flutter and a Python FastAPI backend
- Built and shipped NotMyFault, a lightweight excuse-generator app, end-to-end in Flutter

FreshCart — Mobile Grocery App UI/UX Design

Figma, Stitch AI

- Designed a Product Listing screen with reusable Product Card and Button components (default, hover, added-to-cart variants)
- Created a mini design system (color and text styles) meeting WCAG AA contrast; scored 30/30 on the assignment

Friends Cafe — Business Website

Spring, HTML, CSS, JavaScript

- Designed and developed a business website for a local cafe client, using Spring for the backend

CERTIFICATIONS

SQL | Python | JavaScript — Coursera
