Hujaif Belim

Flutter Developer

Ahmedabad, India | 8320550931 | hujaifbelim@gmail.com | linkedin.com/in/hujaif-belim21 | github.com/hujaif21

SUMMARY

IMCA student seeking Flutter Developer and Software Development internships. Builds cross-platform mobile apps with Dart/Flutter and FastAPI, with backend experience in Supabase, PostgreSQL and Google Sheets. Strong foundation in Java, Python, SQL and Data Structures and Algorithms (DSA).

EDUCATION

LJ University, Sarkhej, Ahmedabad | *2024 – 2027 (Expected)*
Integrated Master of Computer Applications (IMCA) | Currently in 5th Semester | CGPA: 8.95 (Sem 4)

TECHNICAL SKILLS

Mobile & Languages: Flutter, Dart, Python, Java, C, JavaScript, PHP, SQL
Backend & AI: FastAPI, Supabase, PostgreSQL, Spring, Google Sheets (as backend), Google Gemini API
Web: HTML, CSS, JavaScript
Core CS: Data Structures and Algorithms (DSA)
Design & Tools: Figma (UI/UX design, design systems), Miro, Penpot, Git, GitHub

PROJECTS

FitZen — Fitness Tracker App | *In Progress | Team of 3*
Flutter, Dart, Google Sheets
- Built a food-scan feature that returns real calories, protein and carbs for scanned food items
- Implemented a pedometer that tracks real step counts using the device's motion sensors
- Used Google Sheets as a lightweight backend database for seamless data persistence
- Designed the brand identity, logo and custom theme for a consistent cross-platform UI

MockMate AI — AI Interview Preparation Platform | *In Progress | Team of 3*
JavaScript, Python, Supabase, PostgreSQL, Google Gemini API
- Building a web app that simulates job interviews with dynamic, role-based questions and AI-generated feedback
- Integrated Gemini with a local NLP fallback to score answers on communication, structure and technical depth
- Set up Supabase Auth and Postgres with Row-Level Security, plus a code editor and PDF feedback-report export

Dhikr Counter Pro & NotMyFault — Mobile Apps
Flutter, Dart, FastAPI, Python
- Developed Dhikr Counter, a cross-platform counting app built with Flutter and a Python FastAPI backend
- Built and shipped NotMyFault, a lightweight excuse-generator app, end-to-end in Flutter

FreshCart — Mobile Grocery App UI/UX Design
Figma, Stitch AI
- Designed a Product Listing screen with reusable Product Card and Button components (default, hover, added-to-cart variants)
- Created a mini design system (color and text styles) meeting WCAG AA contrast; scored 30/30 on the assignment

Friends Cafe — Business Website | *Team of 3*
Spring, HTML, CSS, JavaScript
- Designed and developed a business website for a local cafe client, using Spring for the backend
